

ISSUE 65 | 1ST - 5TH MARCH, 2021

Nyeri farmers reap big through ASDSP programme

The ten-year programme ending next year will have benefited thousands of farmers in the county who have been trained through farmers' groups.

By Govwenor's Press Unit

Agriculture sector plays a key economic role for Nyeri County's residents seeing that most engage in the trade in both small scale and large scale. In line with this, under the stewardship of H.E Governor Mutahi Kahiga, the County Government of Nyeri has continued to sup-

port Nyeri farmers through private public partnership with international entities and donors.

One of the notable projects from such partnerships is the Agricultural Sector Development Support Programme (ASDSP) which has been running in the county for the

last nine years. ASDSP has been implemented in two phases, focusing on the three value chains of cow milk, Indigenous chicken and Irish potatoes.

Continued on page 2,3 & 4

Ornamental fish rearing in Nyeri County

Commercial fish farming started in Kenya in the 1920s and has been on the constant rise since. Very little however, is known about ornamental fish farming which is one of the fastest growing types of commercial fish farming in Africa.

The complex will be of much help to the over 1,700 students who are acquiring knowledge and skills through innovation and research at the facility.

Story on page 14

Kshs. 75 million ASDSP programme benefit Nyeri farmers

Continued from page 1

In phase one, the farmers through capacity building spent Kshs. 38 million while in phase two which started in year 2017- 2022 has been allocated Kshs. 37 million.

Through ASDSP, the county government has increased productivity of prioritized value chains, strengthened entrepreneurial skills of value chain actors, improved access to market by value chain actors, strengthened structures and capacities for coordination, cooperation and consultation in agriculture sector.

The programme aims at promoting commercialization of priority value chains through capacity building of the value chain actors to increase agricultural productivity.

According to ASDSP County Coordinator Robert Wamani, the programme is geared towards coming

up with sustainable value chains for both income generation and creation of employment.

The ten-year programme ending next year will have benefited thousands of farmers in the county who have been trained through farmers' groups.

"In collaboration with our partners, we have also focused on matters of inclusivity making sure we engage both the youth and women as well as focus on envi-

ronmental resilience. We have covered all the eight sub-counties, with over 3,000 farmers benefitting through this programme," added Wamani.

Nyeri farmers have every reason to smile seeing the numerous benefits they have reaped through this programme.

Cow milk

Antony Kingo'ri, a dairy farmer from Othaya and

one of the beneficiaries of ASDSP noted that he has received extensive training on embryo transfer and animal feeds which has not only improved his dairy pedigree but also increased milk production.

"I wish to thank the extension officers for teaching us on embryo transfer. I have adopted the technique and I'm reaping great results. My cows are now pedigrees (pure-bred) and the calves are strong. The benefit of making animal feeds at home is that the product is of high quality and safe consumption," noted King'ori.

Mary Muthoni, a dairy farmer also gave credit to ASDSP where she learnt about growing hydroponic fodder which is grown from barley is of high quality of supplements and is required in low quantity.

"I started farming the crop about three years ago and it has been of great benefit to my cows as they are now healthier and milk quantity has increased. I would like to urge fellow farmers to learn more about this technique. The ASDSP can also link you to financial service providers to get some funds which will help you in the construction of a hydroponics housing unit," she added.

Irish potatoes

Ann Muchomba, a service provider and an Irish potato farmer from Kiambogo, thanked the ASDSP for the facilitation of groups that in turn helped them to reach more farmers in the community. She also thanked them for the training offered in Nyandarua as well as the benchmarking programmes. “The groups have learnt how to purchase products to help minimize cost of production while boosting their yields. Further, I encourage farmers to learn about value addition to help create maximum production as well as reaping benefits,” added Muchomba.

Through the ASDSP, the youth have also been trained on production of high quality produce using modernized techniques. One such group that has benefitted from this programme is the Jipange Kimuri Youth Group, whose production has increased gradually with the farming

skills gained through the programme.

Indigenous Chicken

Alice Kiberenge, an input supplier of chicks, asserted that the fact that they were able to come together as a group (Rware Breeders) hailing from areas such as Othaya, Kieni, Mukurwe-ini and Nyeri through the intervention of the ASDSP has enabled them acquire skills and obtain links with the Poultry Value Chain players. “The ASDSP has brought us

together as a group and has trained us on the importance of coming together while also providing us with the necessary technical skills in chick brooding. The programme has also provided us with links which have gone a long way in ensuring we get a market for our chicks which was quite a challenge before,” she added.

Josephine Chege, an indigenous chick producer, also gave credit to the ASDSP for training them on chicken rearing which has contributed to extreme notable growth. She also encouraged

women to join such groups which will make them dependent on themselves rather than waiting on their men for provision.

“The ASDSP has trained our group on the right way of rearing chicken as well as the necessary measures to be taken in cases of sick chicks which has really made us grow our flock. As soon as they stepped in, it became easier for us and for this, we are very grateful,” noted Josephine.

Hay and biogas production

Farmers have also benefitted with trainings on hay production as well as production of biogas.

One beneficiary Eliud Kangethe, noted that he received training through the ASDSP on how to grow good quality hay, which he cultivates on his four acre piece of land. He acquired knowledge through the programme.

“Through ASDSP, I was provided with skills on my four acre piece of land which I use for hay production which I later store in storage units. The hay harvested ensures I have animal feed even during the dry seasons. Further, the management of the grass is easy because it requires no cost. One acre provides two hundred bales and only two are required for one cow for one feeding,” he added. ASDSP is also committed to conserving the environment hence has put in efforts to alternative sources of energy. Through the programme, farmers have been trained on biogas production which is a renewable, as well as a clean, source of energy. Lydia Kagema a retired teacher from Tetu sub-coun-

ty is a living example of how transformational the alternative energy is as she now produces bio-gas. She elaborates that energy produced from the biogas has helped in minimizing the cost of electricity at her home, as well as conserving the environment by reusing the waste product produced by her animals. “I am a happy person since biogas has significantly reduced my electricity costs.

Previously, I used to pay over Kshs. 5,000 but right now I am paying Kshs. 500 and I’m using it for several purposes including cutting nappier grass using chaff cutter, lighting my house and cooking,” she added.

Other achievements from ASDSP include:

- Strengthening of County Agriculture Sector Steering Committee through holding meetings.

- Reviewing of Strategic Integrated Value Chain Action Plans (SIVCAPs)
- Mapping of county policies strategies, regulations and plans.
- Involving stakeholders and holding VCP meetings.
- Drafting the County Irish potato Strategy in partnership with National Potato Council of Kenya (NPCK).
- War room data collection on surplus stocks and Capacity needs assessment of VCAs using the entrepreneurship tool.
- Collaboration with other partners like Kenya Climate Smart Agricultural Project and KYEP.

The County Government of Nyeri is determined to retain such collaborations as the one they have with ASDSP as it will notably foster agricultural productivity for Nyerians.

CGN, WSPU & KOREA BPCE follow up meeting

By Peter Wangari

H.E Governor Mutahi Kahiga joined Korean Ambassador to Kenya H.E Choi Yeonghan and World Scout Parliamentary Union (WSPU) Kenya for a consultative meeting at Parliament Buildings, Nairobi.

This was a follow up meeting after the partnership MoU signing between the County Government of Nyeri and WSPU.

The main agenda discussed was the support of the proposed Baden Powell Centre of Excellence (BPCE) that seeks to honour Scouts

PHOTO: PETER WANGARI

Movement founder, Lord Baden Powell. Lord Baden Powell is recognized internationally for his selfless devotion and contribution to the growth of the

movement. Powell together with his wife are buried in Nyeri and their graves have been one of the tourist attraction sites. The centre will further promote

scouting tourism in Nyeri County, which was the last home of the foundaree, as well as create numerous employment opportunities.

Ornamental fish rearing in Nyeri County

By Brian Kanyugu

Commercial fish farming started in Kenya in the 1920s and has been on the constant rise since. Very little however, is known about ornamental fish farming which is one of the fastest growing types of commercial fish farming in Africa.

Fresh water ornamental fish production is majorly done in captivity whereby fish farmers rear the fish in ponds and tanks. Despite there being over 200 species of fish in the ornamental fish trade in the country, it is dominated mainly by the goldfish, mollies and Koi fish species.

Wilfred Mwangi together with his wife Mary Wahito, owns and runs Savannah Ornamental Fish Farm in Mukurwe-ini Central ward, Mukurwe-ini sub-county and stocks the following fish breeds; Black Moor, Platy, Koi, Shubunkin, Goldfish, Guppies, Sword tails and Gourami. The conceptualization of this farm came about in 2011 after Wilfred attended a training session on fish

rearing. Wilfred decided on ornamental fish as at the time since it wasn't an area that many farmers had ventured into thus creating a market gap.

Mukurwe-ini is also enviably blessed with conducive

weather for fresh water fish farming. Savannah Ornamental Fish Farm has numerous ponds for various purposes, be it egg-bearing, hatching or growth depending on the type of fish as they all have different specific requirements for effective growth. Several methods exist for the breeding of ornamental fish.

The farm mainly applies the following methods:

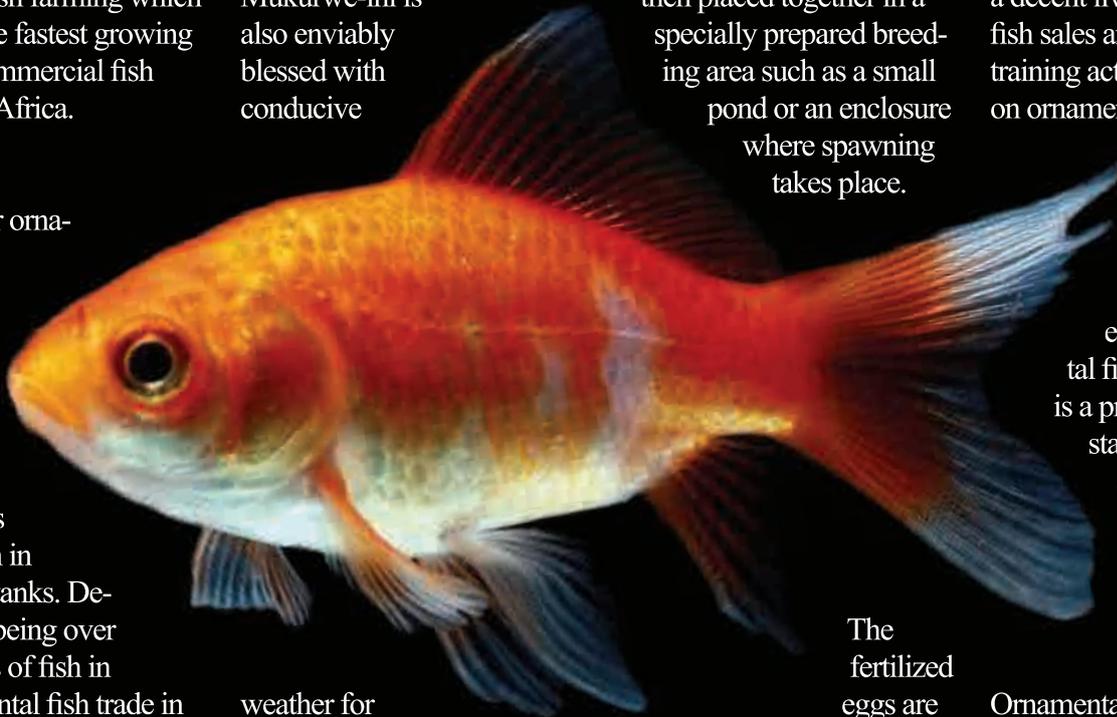

- Natural breeding- this is where males and females are placed together in a breeding area such as a small pond

or an enclosure where they spawn naturally.

- In semi-natural breeding- the female fish are first given one injection of chemicals which triggers spawning. Males and females are then placed together in a specially prepared breeding area such as a small pond or an enclosure where spawning takes place.

Savannah Ornamental Fish Farm, whose mission is to be the number one fish farm in the area as well as to be

recognized in the country earns Wilfred and his family a decent living from their fish sales and from the training activities they offer on ornamental fish rearing. He urges the people of Nyeri County and ultimately Kenyans to embrace ornamental fish farming as it is a proven source of a stable livelihood and as it currently accounts for only 3% of the fish in aquaculture in the country.

The fertilized eggs are usually collected and reared under improved conditions, either natural or artificial.

- Artificial propagation- the females are given one or more injections of chemicals which regulate the final ripening of dormant eggs in the ovaries. As soon as the eggs are ripe, they are stripped from the females. The males are usually also injected. Eggs are artificially fertilized with sperm obtained from the males and reared under controlled conditions.

Ornamental fishes form an important commercial component of aquaculture, providing for aesthetic requirement and upkeep of the environment. Not only does it provide a space for people to do what they love but also an income-earning venture. Unlike other business, this type of fish farming requires less labour and space hence a good business venture particularly for the youth.

Governor hosts the new Nyeri judge

Justice Florence Muchemi who previously served in Embu for 6 years, is in Nyeri to replace Justice Jairus Ngaah who relocated to Nairobi.

By Florence Wangechi

The new Nyeri presiding judge Hon. Lady Justice Florence Muchemi paid a courtesy call to H.E Governor Mutahi Kahiga at his office.

During the meeting, the Lady Justice stated that she was impressed by the cordial working relationship she has observed between the County Government of Nyeri and the judiciary.

She further noted that there are possible areas of cooperation that the two entities could work on so that justice is administered in a better way to the residents of Nyeri. These areas include; establishment of a county court, expansion

of courts in Kieni West, Kieni East and Tetu sub-counties, training of county enforcement officers on handling of arrested persons, finding alternative dispute solutions, and training of the court staff on fire safety and

firefighting.

Governor Kahiga pointed out that it is indeed true that the judiciary and the county government have worked seamlessly in the past, noting that he looks forward to continue with

this synergy for the benefit of Nyeri citizens.

Justice Florence Muchemi who previously served in Embu for 6 years, is in Nyeri to replace Justice Jairus Ngaah who relocated to Nairobi.

New CoG leadership meets Senate's devolution committee

By Kennedy Karanja

Nyeri Governor H.E Mutahi Kahiga joined CoG chairperson H.E Martin Wambora and colleague governors chairing various committees at the Senate Chambers, main Parliament buildings, Nairobi.

The meeting chaired by Senator Moses Otieno Kajwang' deliberated on how to establish smooth working relation-

ships between the Senate and the Council of Governors in a bid to ensure optimal service delivery to local wananchi.

They also discussed measures to creating a seamless working relationship between the governors and senators. Another agenda raised was the timely disbursement of County revenue allocation funds which will ensure efficiency in the workings of the county governments.

Health team meets governor

The team is in Nyeri County to follow up on the NASCOP project dubbed 'KINGA' which aims to achieve safety infusion towards the safety of patients and health workers.

By Njambi Mugo

Nyeri Governor H.E Mutahi Kahiga was delighted to host a team from the Ministry of Health led by the National Aids, STI Control Programme (NASCOP) towards the safety of patients and health workers. This is a three-year ongoing programme which has been piloted in 9 facilities across the country, and later needed cannulas which are more efficient and a mentorship programme and training across the facilities. This programme is being executed in close collaboration with

Programme Officer Japheth Gituku. The team is in Nyeri County to follow up on the NASCOP project dubbed 'KINGA' which aims to achieve safety infusion to be absorbed across all health facilities. The programme entails administration of Hepatitis B vaccines and tests to all health workers, administration of safety engineering to be absorbed across all health facilities. Amref Health Africa which is an implementing partner for Centre for Disease Control and Prevention (CDC) and Becton, Dickinson and Company (BD).

CPCT capacity building meeting

By Ivy Muruga

The Kenya Urban Support Programme team held a meeting with the Nyeri County Project Coordinating Team (CPCT) to train them on areas related to financial management and procurement.

This is part of the KUSP – National Project Co-ordinating Team (NPCT) responsibility to offer technical assistance to the municipalities in the preparation of financial reporting systems as well as ensuring the reports are harmonized across the 59 municipalities.

The Nyeri CPCT is overseeing the implementation of the Nyeri Main Bus Termini located at the Asian Quarters, which is a program funded by the World Bank through KUSP.

The team comprises of the CEC and Chief Officer Lands, Physical Planning, Housing & Urbanization, an environment officer, social safeguard officer, project manager, project coordinator, internal auditor, project accountant, physical planner, procurement officer, municipal manager and chair municipal board.

The state department of Housing and Development through the Kenya Urban Support Programme (KUSP) has disbursed Urban Institutional Grants (UIG) and Urban Development Grants (UDG) to counties with the aim of establishing and strengthening urban institutions through infrastructure development.

Stocking of fingerlings at Mugunda ward

The team delivered 30,000 fingerlings in continuance of a countrywide project to stock two million fingerlings across all 47 counties.

By Brian Kanyungu

PHOTO | BRIAN KANYUNGU

The Kenya Fisheries Service (KeFS) in collaboration with officers from the Department of Agriculture, Livestock and Fisheries engaged in a fingerling stocking activity at Githura dam in Mu-

gunda ward.

The team delivered 30,000 fingerlings to the Mugunda community in continuance of a countrywide project to stock 2 million fingerlings across all 47 coun-

ties.

KeFS further plans to supply 50,000 more fingerlings in Nyeri County, a process that will be facilitated by the county government through the Department of Agriculture.

Speaking at the forum, KeFS Board Chairman, Gonzi Rai expressed great pleasure and confidence in this project, noting that it will be of help to the community in three crucial pillars: income generation, creation of employment and improved health standards. He guaranteed the national government's commitment to working with the county governments to ensure the success of this project.

Locals expressed their gratitude towards the KeFS for offering them an opportunity to not only better themselves but also to enhance the status of their community through aquaculture.

Tetu Self Help Group to partner with CGN

By Faith Hiuhu

H.E Governor Mutahi Kahiga hosted group members of 3km Men Self Help Group in his office.

The group that comprises of 15 members from Kiriti, Kigogo-ini, Kagundu-ini and Muthua-ini areas in Dedan Kimathi ward, Tetu sub-county was founded in year 2016 to mentor and empower children as well as the youth in their community.

The County Government of

Nyeri is committed to supporting such groups in their programmes as part of public private partnership. This will help to transform the county and uplift the living standards of its citizenry.

Speaking during the meeting, the group members led by the Secretary Paul Ngambi and Vice Chairman John Muriithi applauded the governor for his exemplary performance of improving infrastructure in the county.

PHOTO | PETER WANGARI

In brief...

H.E Governor Mutahi Kahiga had the pleasure of having a development oriented meeting of Kinyaiti village with the “KINYAITI TUMEKOSA MAJI SINCE 1984” ambassador Isaac Ngigi. The main agenda of the meeting was to discuss sustained water provision to Kinyaiti residents and the larger Endarasha/Mwi-yogo ward in Kieni West

sub-county. Kieni is the largest constituency in Nyeri County, covering a land mass of 52% of Nyeri county. It is however classified as an ASAL area because it falls on the leeward side of Mt. Kenya. A sustainable module of providing adequate water to its residents needs to be critically looked into, especially in light of the climate change

challenge. The County Government of Nyeri is leveraging on partnerships with other govern-

ment agencies to ensure we alleviate the water challenge in this area once and for all.

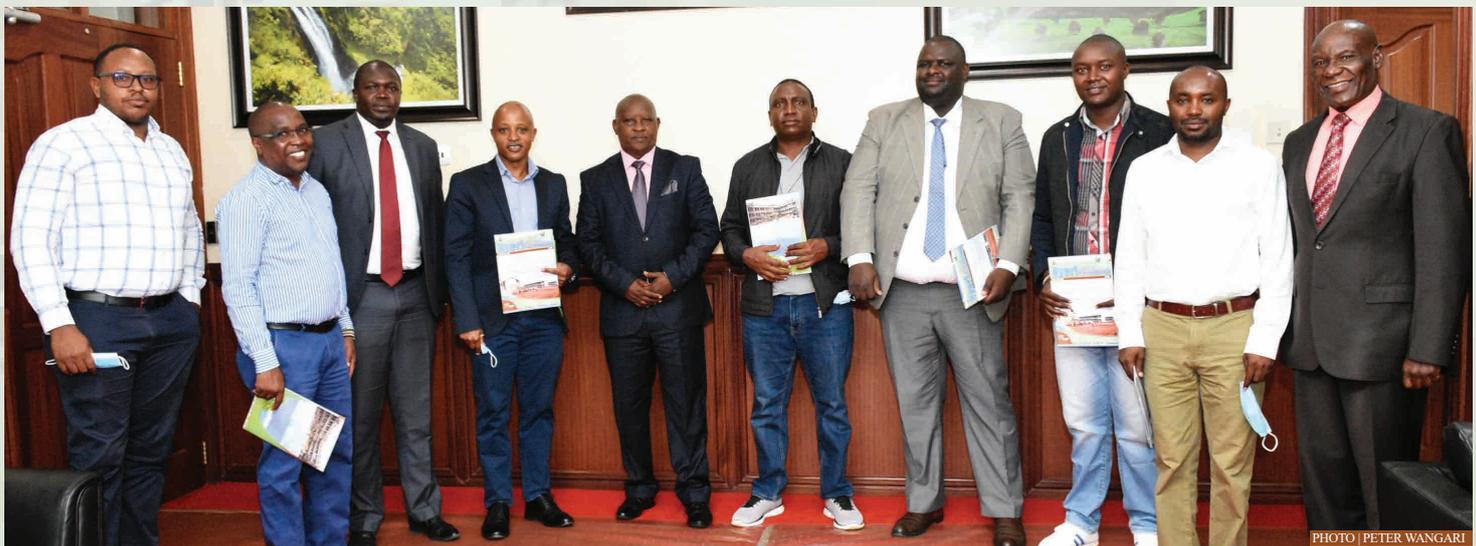

PHOTO | PETER WANGARI

They also agreed to partner in the education sector in particular TVETS. Safaricom is also setting up free convenience WiFi at Whispers Park, Nyeri town.

Nyeri County to benefit through public private partnership

By Njambi Mugo

Nyeri Governor H.E Mutahi Kahiga hosted a team from Safaricom PLC led by Mt. Kenya and North Eastern Regional Manager Jackson Mutua in his office. They deliberated on areas of public private partnership

between the two entities including the health sector and trade sector by supporting small and medium enterprises with an aim of promoting economic empowerment in the region. They also agreed to partner

in the education sector in particular TVETS, which the company pledged to support through equipping and internet connectivity. Safaricom is also setting up free convenience WiFi at Whispers Park, Nyeri town.

Governor Kahiga welcomed this partnership noting that it will greatly benefit Nyeri residents. The meeting was held ahead of the CEO's, Peter Ndegwa, visit next week.

Nyerians to benefit from CGN, KEBS partneship

By Faith Hiuhu

Nyeri County Secretary Ben Gachichio hosted a team from the National Standards Council (NSC) on behalf of H.E Governor Mutahi Kahiga at Townhall grounds, Nyeri town.

The NSC is also the Board of Directors of the Kenya Bureau of Standards (KEBS) and is the policy-making body for supervising and controlling the administration and financial management of the Bureau.

The National Standards Council (NSC) is set for a series of grassroots visits to various counties for a fact-finding mission to establish the state of quality standards compliance.

The team led by NSC chair-

man Eng. Bernard Ngore, noted that they are happy with the progress and innovativeness when it comes to SMEs as they traversed through Nyeri County.

They further acknowledged and appreciated the support they have been receiving from the County Gov-

ernment of Nyeri and the commitment it has towards ensuring that its citizens get value for their money.

Speaking in the meeting, Trade, Tourism and Cooperatives CEC Diana Kendi encouraged the partnership between KEBS and the county government noting that it

will go a long way in ensuring that there will be promotion of fair trade which will in turn benefit Nyeri citizens. The county secretary reiterated the commitment of the Nyeri County's leadership towards helping its citizens achieve quality standards in their business ventures.

Badminton training held at YMCA Hall Nyeri

By Zipporah Mwangi

Nyeri Education and Sports CEC Margaret Macharia kicked off a two day badminton training at the YMCA hall in Nyeri town.

Badminton is an indoor game played in Kenya. In a bid to grow the popularity of the game, Badminton Kenya in partnership with Badminton World Federation and Badminton Confederation of Africa is conducting trainings across counties in Kenya through a program called Shuttle Time.

The training is targeting all

badminton coaches in the county and has already been rolled out in four counties;

that is Nairobi, Nyeri, Machakos and Eldoret and is being co-ordinated by Jeff Shi-

goli, the Secretary General Badminton Kenya.

Consultative meeting on Kuza Kazi Programme

In order to close the Nyeri youth unemployment gap, the county government has collaborated with various partners in the implementation of Kuza Kazi Programme.

By Faith Hiuhu

The County Government of Nyeri through the Department of Gender, Youth and Social Services held a meeting to finalize on details about the Kuza Kazi Programme ahead of its launch in Nyeri County.

In order to close the Nyeri youth unemployment gap, the county government

has collaborated with various partners in the implementation of Kuza Kazi Programme. The partners include Almasi Bottlers Limited and Ogilvy.

The team held a consultative meeting with the key stakeholders to deliberate on the way forward and on how they are going to suc-

cessfully carry out this program.

In the meeting, Gender CEC Esther Ndung'u expressed the Nyeri County leadership's commitment towards creating opportunities for the youth which will wholly uplift their lives.

The stakeholders who included Almasi outgoing

General Manager Amos Chege, Incoming General Manager Philip Gikunju, Almasi Regional Manager Jacqueline Mwirigi, Ogilvy PR and Influence Winnie Kariuki and Grace Mukasa also paid a courtesy call to H.E Governor Mutahi Kahiga.

In brief...

Governor joins Akurinu in tree planting event

The church members who are celebrating 100 years since inception of the church are planning to plant over 200,000 indigenous trees in public lands in Nyeri County.

By Faith Hiuhu

H.E Governor Mutahi Kahiga launched a tree planting exercise for the General Conference of Akurinu Churches at Tumutumu Hill, Kirimukuyu ward in Mathira West sub-county. The church members who are celebrating 100 years since inception of the church are planning to plant over 200,000 indigenous trees in public lands in Nyeri County.

The team led by the National Secretary General Rev. Macharia Prince lauded the County Government of Nyeri under the leadership of Governor Kahiga for exemplary leadership and good management of the people's resources.

The governor on the other

PHOTO | KENNEDY KARANIA

hand thanked the Akurinu Church for this initiative saying that this will aid in the conservation of the environment and increase the forest cover from 38.3% in the county.

Nyeri County boasts of having the highest percentage of

tree cover at 38.3% percent and the governor is determined to retain it by supporting initiatives that seek to increase it.

He also urged the church members to ensure that they document their rich history for future reference.

Trees are an important part of every community as they contribute to their environment by providing oxygen, improving air quality, climate amelioration, conserving water, preserving soil and supporting wildlife.

PRA training at Wambugu ATC Farm

By Brian Kanyungu

The Aquaculture Business Development Programme (ABDP) in close collaboration with the Department of Agriculture Livestock and Fisheries is in the process of applying Participatory Rural Appraisal training (PRA) in identified working areas in Nyeri County. In order to achieve this, 40 participants made up of sub-county fisheries officers and the programme implementing team from Mukurweini and Othaya were taken through a two-day training at the Kenya School of Agriculture at Wambugu farm after which the team is expected to use the various taught PRA tools to collect data for PRA reports.

PRA is an approach used to identify problems and opportunities in various value chains. The approach aims to incorporate the knowledge and opinions of rural people in the planning and management of development projects and programmes.

PRA can assist in forming better links between communities and the agencies and institutions concerned with rural development. This can benefit aquaculture workers by helping them with the monitoring of aquaculture development and environmental issues related to aquaculture.

The key areas in question will be listing of community problems, analyzing the problems, and identifying the existing opportunities. After which they will establish an Aquaculture Development Area Action Plan (ADA-AP).

The team is further expected to carry out a PRA training locally on fish farmers in Mukurweini and Othaya which will thereupon be replicated in the other sub-counties of Nyeri county.

Celebrating International Women's Day

By Jane Baru

The County Government of Nyeri through the Department of Gender, Youth and Social Services joined the Nyeri Women's Prison in celebrating the International Women's Day. The annual event, which is celebrated on March 8th also marks as a call to action for accelerating gender equality and women empowerment.

The theme for this year "Women in leadership: Achieving an equal future in a Covid-19 world" celebrates the tremendous efforts by women and girls around the world in shaping a more equal

future and recovery from Covid-19 pandemic.

Speaking during the event, Gender CEC Esther Ndung'u lauded the good work being done by the management in terms of rehabilitating and re-integrating the prisoners back into the society. She also called upon the convicts to put to good use the skills training offered at the prison to help them eke out a living once they leave jail. She also encouraged them to stay focused, find their footing and not give up despite the challenges faced by women in in-

carceration.

Accompanying the CEC was the department's Chief officer Mr. George Mwangi, who emphasized on 'learning your lesson and moving ahead,' and also reassured the convicts of their worth as women.

The over 60 women were also sensitized on cancer awareness as well as received cancer screening, family planning and sexually transmitted diseases education.

During the visit, the department presented sanitary towels, diapers, food items and snacks to the facility.
