VETERINARY SERVICES
SERVICE DELIVERY PROCESS DOCUMENTATION
ARTIFICIAL INSEMINATION PROCESS**

Farmer

Farmer requests for AI services from the office (must indicate time signs of heat were noticed in the animal)

SVCO

An inseminator is identified relevant to the area concerned. Where the farmer knows the AI provider, he/she calls directly

Inseminator

The AI provider procures semen and transport from the office

Inseminator

The AI provider visits the farm/farmer, takes history and examines the animal.

Inseminator

The AI provider inseminates the animal if it qualifies for the service or gives a recommendation if it does not qualify

Inseminator

The AI provider fills records in a digital form .

Inseminator

The AI provider then files a back to office report
